On The Way Home

Turn the key and start the car
The distance to where you are
Never seems quite as far
On the way home

Seen the signs a thousand times
They never made sense to me
Just part of the scenery
On the way home

All that disasters
That litter my past
Have led to this moment all my own
On the way home

On the way home

Hear your laughter in the air
Your voice is everywhere
Reminds me of times we shared
On the way home

All the disasters
That litter my past
Have led to this moment all my own
On the way home

On the way home
Remembering the times when I felt strong
On the way home
Returning to the place where I belong
On the way home
I write the missing verses of my song
On the way home
Returning to the place where I belong

Open up the door I see you waiting for me
All the feelings locked inside are suddenly free
My search has ended

Now that I'm home

On the way home
Remember the times when I felt strong
On the way home
Returning to the place where I belong
On the way home
I write the missing verses of my song
On the way home
Returning to the place where I belong
